SECTION C DESCRIPTIONS AND SPECIFICATIONS

BACKGROUND

The Warfare Systems Engineering (WSE) Directorate, SEA 06, was established in 2003 to incorporate emerging Naval Sea Systems Command (NAVSEA) initiatives into a new combat and weapon system focused organization that enables/facilitates the deployment of fully mission-capable strike groups; establishes a common disciplined warfare systems engineering process that optimizes cost, schedule, and performance requirements at the force level; and ensures that force-level interoperability requirements are met. SEA 06 is chartered to provide common NAVSEA systems engineering processes, balanced technical and programmatic authority, and objective engineering leadership. Today, SEA 06 manages combat systems and “systems of systems” (SoS) to resolve any cross-platform concerns, ensuring compatibility with joint and coalition forces. SEA 06 will accomplish the specific items under its cognizance by establishing and ensuring adherence to standards, policies, and systems engineering processes by Program Executive Offices (PEOs) and Program Managers (PMs). Further, it has the responsibility to manage the Strike Force Interoperability program, support Office of the Chief of Naval Operations (CNO) N7’s acquisition and programmatic assessments; and serve as NAVSEA’s Technical Authority (TA) for Naval surface warfare, combat and weapon systems.

SEA 06 manages the execution of the NAVSEA technical authority process to ensure continued viability of key WSE technical competencies at headquarters and within the Naval Surface Warfare Centers (NSWC). Further, SEA 06 is responsible for executing the Naval Warfare Systems certification process that includes platform integration certification and force interoperability. Further, SEA 06, as the Fleet’s agent to execute the Command, Control, Communications, Computers, Combat Systems and Intelligence Modernization Process (C5IMP) under the CNO’s Fleet Response Program (FRP), has established detailed certification milestones to ensure combat systems are fielded, fully integrated, interoperable and mission capable. Attachment (2) provides a List of Acronyms contained within this document and attachment (3) provides a List of References cited in the Statement of Work.

PAYMENT INSTRUCTIONS FOR MULTIPLE ACCOUNTING CLASSIFICATION CITATIONS (NAVSEA) (APR 2004)

(a) This contract is funded by multiple accounting classification citations referred to as accounting classification reference numbers (ACRNs). Contract line item numbers (CLINs) are further broken down into sub line item numbers (SLINs) in Section B.

(b) Invoicing Instructions: The contractor is required to invoice by CLIN/SLIN and ACRN. Invoices should not reference both the CLIN and SLIN. If the SLINs are shown on the FAD sheet and ACRNs and dollar amounts have been identified for them, then only the SLIN is required not the CLIN. The ACRN is always required. The amounts invoiced for each ACRN cannot exceed that authorized for each CLIN/SLIN as identified on the FAD sheet.

(c) Payment Instructions: Pay according to the CLIN/SLIN/ACRN cited on the invoice or progress payment. Each ACRN assigned to the specific CLIN/SLIN should be charged in the amount assigned to each CLIN/SLIN as identified on the FAD sheet as long as the amount does not exceed that authorized for the assigned ACRN, CLIN or SLIN. In the event the invoice or progress payment has not identified specific amounts to be paid from each ACRN, payment for each ACRN shall be prorated across all ACRNs assigned to that CLIN/SLIN on the invoice or progress payment.
